Brief Biographical Sketch

Bruce W. Small is a practicing dentist with a busy private practice in Lawrenceville, New Jersey concentrating on clinical excellence in restorative dentistry. Dr. Small is a clinical instructor at the University of Medicine and Dentistry of New Jersey from which he has received the prestigious distinguished alumni award. He was the director of an elective/selective for senior dental students on cast and direct gold at UMDNJ for 12 years.

He has been granted the honor of a fellowship in both the International and American College of Dentists. He is a master of the Academy of General Dentistry and received the prestigious Albert Borish award in 2010. He was the editor of the Restorative Dentistry column in *General Dentistry*, the journal of the Academy of General Dentistry for 15 years. He is a member of many other dental academies including The American Academy of Restorative Dentistry, current president of The Academy of Operative Dentistry, president elect of The American Academy of Gold Foil Operators, and a past president of the Academy of R.V. Tucker Study Clubs. He is the mentor of three Tucker gold study clubs and continues as a member of one.

During the past 25 years he has given numerous presentations to dental schools, laboratories, study clubs, local, state, regional, national, and international dental meetings about his experiences with clinical dentistry and has published over 100 articles in refereed and non-refereed journals. Using scientific research as well as over 40 years of clinical experience, his teaching goal is to help others develop a rational and evidenced based approach to restorative dentistry particularly when using new dental materials. He is one of the very few speakers who can address the indications and clinical technique for esthetic materials as well as cast and direct gold.

His hobbies include golf, skiing, "O" gauge model railroading, and playing the guitar.
